MICROLITE

- Lightweight & easy to use
- Amazing stability
- Stabilising devices are a legal requirement for trade use

The ultimate Industrial duty ladder stand off. The only stabilising device that secures the ladder at the top, which is where most slippages occur. Very rigid and robust but really lightweight – only 1.8kg.

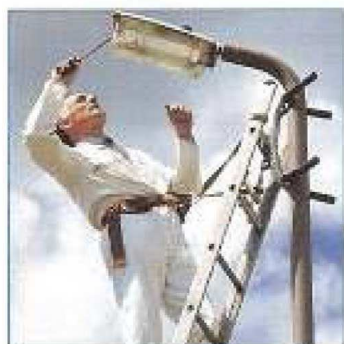

The Microlite is made of aluminium alloy and simply hooks over two ladder rungs and is retained with two spring clips – fitted in just a few seconds. The remarkable “D-Wheels” are a standard fitting for safety and ease of extending. Ladders are instantly secured at the top before climbing up.

Microlite can be fitted so that the ladder projects several rungs above a windowsill, giving a secure handhold and avoiding stretching or climbing too far up the ladder. Fits all popular ladders, timber or aluminium, except window cleaners’ pointed top ladders.

Special design means extension ladders can be closed down completely without removing the Microlite.

LIGHTING COLLAR

- Use with telegraph poles, street lamps or on building corners
- Quick to fit, no tools needed
- Stabilising devices are a legal requirement for trade use

Secures the top of a ladder to lighting columns or masts before climbing up. Unique Double Fork – Unlike ordinary centring devices, the upper and lower forks counter each other and virtually eliminate twisting on columns.

Self-adjusting – the pivoting action keeps both forks firmly on a lighting column as it moves under load. Highly effective regardless of the ladder’s angle, the column diameter or the column profile. Fits all ladders of all popular makes and sizes.

Quick fitting – takes only a minute or so – simply tighten two knurled nuts. No tools required.

LADDER STOPPER

- Simple & reliable performer
- Industry leading Rojak brand
- Stabilising devices are a legal requirement for trade use

High quality aluminium T-piece bonded into an 11mm vulcanised rubber base complete with a 2mm tread top and bottom designed for extra grip even in the wet.

LADDERM8TRIX PRO

- Award winning
- Simple & reliable performer
- Will help compliance with Work at Height Regulations

This anti-slip device can be used on most hazardous exterior surfaces such as grass, oily concrete, tarmac, decking, paving slabs, gravel, snow and even solid ice. The unique 2000 pin base engages the surface without marking or damaging. The top of the Ladder M8rix Professional has an industrial rubber grip with a shoulder to rest the ladder against.

LADDER STABILISER

- Additional vertical ladder support
- Easy to use
- Fits any ladder

The new Working at Height regulations insist on the use of additional ladder safety devices in providing extra stability and to prevent slippage when in use.

The Ankalad stabilises the ladder and helps eliminate bounce, giving you a more solid area in which to conduct short duration work.

The legs can be adjusted for work on uneven ground and the frame fits easily within less than a minute and folds away neatly to clip against the stile of the ladder for storage and transport.

Weights a mere 3.6kg with a safe working load of 150kg.

LADDER LEVELLER

- Fits any ladder
- Stays permanently fitted to ladder
- Adjustable for both directions

It's not always possible to foot your ladder on a flat and solid surface. The Ladder Leveller fits easily to any ladder, can be adjusted on both sides up or down by as much as 75mm. Constructed from high-grade aluminium and total weight of 1kg – the Ladder Leveller is the ideal solution for working on slopes. Three-year manufacturers warranty.

LADDER STAND OFF

- Provides clearance for space to work
- Quick to fit, no tools needed
- V-shape allows user to span drain pipes

Robust aluminium device with a span of over 900mm will hold your ladder 350mm clear of any wall, making access for guttering and window maintenance so much easier. Fits any ladder.

ROOF HOOK KIT

- Secures ladder on the roof
- Quick to fit, no tools needed
- Fits any ladder

Easy roof-ride action. Strong 14-gauge aluminium complete with large wheels and fittings. Clamp to the top of the ladder and transform your extension ladder for use on the roof.

LADDER CLAMPS

- Transport your ladders safely
- Will fit any roof or ladder rack
- Fits doubles & triples

Secure your ladders and steps safely to a roof, ladder or van rack. This is the only ladder lock on the market that locks your ladders down tight and protects against cross winds, theft and accidents. Simple to install, no tools needed and easy to change from vehicle to vehicle. You won't have to worry about loose chains and cord, comes complete with padlock and 1 year manufacturers warranty against defects. A must when transporting ladders.
